

JouBeh

TECHNOLOGIES

Crucial Data—Anywhere on the Planet

JouBeh Technologies is playing a critical role in helping researchers and managers to better understand the earth's changing processes and to better manage its resources. With more than 30 years of experience in manufacturing leading edge data collection platforms, *JouBeh Technologies* was launched to provide dedicated data delivery service to the scientific, search and rescue and fisheries management communities.

Innovative Global Telematic Solutions

We Offer

Iridium® Data Services, OEM Terminal Hardware, Antennas and Accessories, *i-Trac* Vessel Monitoring System (VMS), Data Processing, Data Analysis and Web Interface.

Markets Served

JouBeh is focused on the Earth Science and Environmental markets such as Oceanography, Hydrology, Meteorology and Seismology as well as fisheries management. We serve these markets with knowledgeable personnel who understand the challenges in collecting and processing critical data.

Our Strength and Value Added

With more than 30 years of experience in developing Environmental Science instrumentation, *JouBeh* is well positioned to work hand in hand with the research and operational communities to solve their data collection, delivery, analysis and prediction challenges. We also offer our clients full engineering support and design services. We can customize solutions for your instrumentation, software, embedded systems and data display or provide a complete solution.

JouBeh employs a team of knowledgeable and skilled customer service staff and technical specialists who will offer unparalleled support for your telemetry applications. We maintain a network of data processing and secure storage servers, so we ensure your data quality and your security. Our customers demand comprehensive and experienced support for their telemetry applications - *JouBeh* delivers this service.
